Cox Offers Video Visits <https://www.coxhealth.com/services/virtualvisits/>

Virtual Visits offers online care for common conditions like strep throat, allergies and stomach flu. It's all made possible through a live, completely confidential video consultation service. It uses a secure online video connection (like Skype or FaceTime) so you can have a private visit with a qualified CoxHealth medical professional. If you have a computer, smartphone or other mobile devices, you can have an appointment. How easy is that? Online appointments are available for people ages two years and older. There are no unexpected costs and if you need a prescription, we'll call it into your pharmacy. Some Basic Care visits may require additional labs or exams that aren't available in all settings.

Mercy Now Offers Video and Telephone Visits

As a leader in virtual care, Mercy is able to offer many safe alternatives to in-person office visits, for both adult and pediatric care. **Video visits allow you or your child to meet with your provider, securely and confidentially.** It's designed to get you the care you need without waiting for social distancing restrictions to be lifted. Our providers are also using telephone visits for patients who don't have video capability on their computer or phone, or for situations where a full video visit isn't required. Visit [MyMercy](#) for more information or to schedule your video or phone visit today.
